

## MULTI FUNCTION CASING BOWL

**The MOST MULTI-FUNCTION CASING HEAD is designed to work in conjunction with the MULTI-FUNCTION BOP. With its easy entry port it helps guide the coil tubing into the well bore. It is designed that if the MF BOP needs to be removed, the tubing hanger can be positioned into the casing head and locked into place. It also has a foam port providing fewer restrictions during foaming operations.**

- Manufactured from NACE material to meet API 6A
- The tubing hanger can be positioned in the casing bowl and locked into place with the lock down screws.
- 4" side outlet for easy foaming operations. (other sizes available upon request)
- Special easy entry port within the bowl designed to work with the coil tubing port on the multi-function to allow room and guide the coil tubing into the well bore.
- Available to be welded directly onto the casing or studded to be bolted onto an existing casing bowl.
- Available in 7" and 8 5/8" casing size.
